### QBank featured on Capterra's top 20 DAM products

**Capterra recently released their report of the most popular DAM Software in the world and QBank gets #11.**

"Digital Asset Management software (DAM) is designed to keep your media files safe and secure. Be it photographs, videos, logos, and more, these systems seek to keep your company's branding materials cohesive and protected", Capterra writes. QBank is #11 on the list, which contains some of the market's largest vendors like Canto, Celum and Adobe.

"By being on the Capterra top-20-list, we will most certainly gain more international requests as well as getting a better position internationally for future collaborations with partners and customers," says QBNK's CEO Carl Petruson in a comment.

#### About Capterra

Capterra is an American software advisor, specialized in SaaS (Software as a Service) such as Digital Asset Management.
